

Preview of Friday assignment

- leverage your knowledge of Latin nouns!
- automate *parsing* of digital text of Hyginus
- contribute to a collective "who's who in Hyginus"

Adjective forms: review

- use same endings as nouns!
- two main categories:
 - 3rd declension (like *-i* stem nouns)
 - 2-1-2 (endings from second and first declensions)
- [review page highlights](#) some of the gotchas

Third declension: review

- 3 terminations: distinct masculine, feminine, neuter (*acer, acris, acre*)
- 2 terminations: **masculine/feminine**; neuter (*tristis, triste*)
- 1 termination:
 - same *stem* for all forms;
 - like 2-termination, **masculine/feminine**; neuter

2-1-2 declension

Gender:	Maculine	Feminine	Neuter
Use endings from:	2nd declension	1st declension	2nd declension
Adjective example	bonus	bona	bonum
Noun example	filius	filia	exemplum

New today

Small number of *-ius* adjectives:

- 2-1-2 adjectives, but *-ius* genitive singular and *-i* dative singular

Building a web site on github

Reminder:

- translation and composition assignments submitted on github
- host portfolio on public web site

Prerequisites

- account on `github.com`

Overview

1. Create a new repository
2. Modify "GitHub Pages" settings for the repository
3. Add content in *markdown* to the repository

Two URLs

1. Your github repository: <https://github.com/USERNAME/REPO>
2. Your Web site: <https://USERNAME.github.io/REPO>

1. Create a new repository

- log into GitHub
- "create a new repository" page:
 - fill in a name (no spaces)
 - check *Public*
 - check *Initialize this repository with* / "Add a README file"

2. Modify settings

- Find settings (may be in three-dot menu if your window is narrow)
- *Options* tab: scroll to *GitHub Pages*:
 - **Source:** *master* branch, *docs* folder

3. Add content

Back at your repository main window:

- "Add file" menu, "Create new file"
- Use `docs/index.md` for file name
 - when you enter `/`, github interprets it as separating a folder name (`docs`) from a file name (`index.md`)
- Type in a one-sentence summary
- "Commit changes"

Check out your web site!

1. Your github repository: <https://github.com/USERNAME/REPO>
2. Your Web site: <https://USERNAME.github.com/REPO>

More about your web site

When you save a file with `.md` extension, github interprets the contents as *markdown*, a lightweight, plain-text format for structuring documents.
